Depending of the absorption of the paper you must use a bigger mesh.

Aspect:

Satin

Dilution:

SB 2000 – add +/- 10 %max 15%

Drying:

+/- 10 min in open air, immediately in tunnel

Mesh:

P45-77: to obtain a good opacity.

Films:

All solvent resistant emulsions are suited.

Cleaning:

ST 1000 or CT 1000/1

Storage stability:

+/- 1 year

Remarks:

The UV-varnish UV 150 or UV 150/51 release or the solvent based varnish CF 150/14 must always be printed first before the SB 110/2.
Always make a test before you start the production.

Complementary products:

SB 6000: release agent, add 1-2 %, to increase the scratch ability.
